Advances in Traditional and eHealth Research on Non-communicable Diseases

Message from the Guest Editor

NCDs share four major risk factors: tobacco use, physical inactivity, the harmful use of alcohol and unhealthy diets. According to the WHO Global Action Plan for the Prevention and Control of NCDs 2013–2030, progress has been made in addressing tobacco use, but similar progress has not yet been achieved with other risk factors. There is a need for greater use and analysis of data on NCD risk factors, diseases and mortality through traditional and eHealth research to develop targeted public health interventions and evidence-based policy planning. This Special Issue of *Healthcare* seeks commentaries, original research, short reports, and reviews on NCD risk factors, diseases and mortality, as well as on the impact of the COVID-19 pandemic and other health emergencies on NCDs. The aim of the Special Issue is to present advances in research activities on NCDs using traditional and eHealth approaches.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with Healthcare and its members receive discounts on article processing charges.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
