

## Special Issue

# Emergency Medicine and Public Health: Intersecting Strategies for Population Well-Being

### Message from the Guest Editors

Emergency medicine deals with specific health emergencies, while public health focuses on the prevention and management of the health of society. Collaboration in these two fields can include coordinating emergency responses to mass-casualty situations or epidemics. This Special Issue aims to present the relationship between emergency medicine and public health that work together for the benefit of society. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following topics:

- Pre-hospital emergency management and in-hospital emergency procedures;
- Medical didactics using innovative forms of education;
- Cooperation in emergencies, mass accidents, or epidemics;
- Crisis management and the implementation of preventive measures;
- Use of telemedicine in emergency medicine and public health;
- Health promotion programs.

We look forward to receiving your contributions.
