The Management of Children and Adolescents with Obesity: Assessment, Prevention and Treatment

Message from the Guest Editor

Obesity is a major public health problem on a global scale, both in its own right and as a result of its association with other chronic noncommunicable diseases. Several studies have shown that when this disease begins early in life, such as childhood and adolescence, it is more likely to persist in adulthood, with negative health consequences appearing earlier. Therefore, studies on the management of obesity in childhood and adolescence, are essential for guiding healthcare professionals. The aim of this Special Issue is to publish original studies and reviews, including clinical trials and observational studies, that address prophylactic and therapeutic aspects of obesity in childhood and adolescence. Studies may also address methods of assessing body composition in individuals with obesity as a way to identify outcomes obtained in treatment programs. Regarding reviews, we will consider narrative, systematic, and comprehensive reviews, as well as meta-analyses, that examine specific review questions related to the central theme of this Issue. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
