

## Special Issue

# Physiotherapy for Pain Conditions: Recent Advanced Programs and Interventions

### Message from the Guest Editors

Over the past 20 years, the number of publications on the effectiveness of physiotherapy in improving pain conditions has grown considerably. Today, we have a huge amount of information on the effectiveness of physiotherapy modalities such as exercise therapy, manual therapy, and digital health applied to physiotherapy in improving different outcomes in people with pain, such as pain intensity, disability, quality of life, and anxiety/depression symptoms, among others. We are pleased to invite you to provide high-quality evidence-based studies that improve the methodological and clinical quality of research on the effects of physiotherapy on pain conditions. In this Special Issue, all types of research designs will be welcome if they focus on physiotherapy modalities and pain conditions without restrictions in the type of pain. Research areas may include (but are not limited to) the following:

- Acute, subacute, and chronic pain.
- Health conditions closely related to pain (e.g., cancer, rheumatoid arthritis, or stroke).
- Methodological issues related to physiotherapy and pain.

### Guest Editors

Prof. Dr. Javier Martinez-Calderon

1. Department of Physiotherapy, Faculty of Nursing, Physiotherapy and Podiatry, University of Sevilla, 41009 Sevilla, Spain
2. CTS 1110: Understanding Movement and Self in Health from Science (UMSS) Research Group, 41009 Andalusia, Spain

Dr. Cristina García-Muñoz

1. Departamento de Salud, Universidad Loyola Andalucía, 41704 Seville, Spain
2. CTS 1110: Understanding Movement and Self in Health from Science (UMSS) Research Group, 41009 Andalusia, Spain

### Deadline for manuscript submissions

30 November 2025
