

## Special Issue

# Rehabilitation and Care of Musculoskeletal Disorders

### Message from the Guest Editors

We invite you to submit a manuscript to this Special Issue, titled “Rehabilitation and Care of Musculoskeletal Disorders”. Musculoskeletal disorders comprise diverse conditions that might result from hereditary, congenital, or acquired pathologic processes, affecting bones, joints, muscles, and connective tissues. Despite major advances in the therapeutic approaches and findings of our research, there has been limited progress in the prevention and treatment of musculoskeletal disorders. Further investigation of rehabilitation for the care of musculoskeletal disorders would benefit patients, researchers, and clinicians to be more efficient in their decision making. In this Special Issue, original research articles and reviews are welcome. We are pleased to invite you to provide clinicians and researchers with evidence-based recommendations regarding what should be used in rehabilitation, attracting novel, evidence-based, robust concepts in the care of musculoskeletal disorders. We look forward to receiving your contributions.
