

Special Issue

The Old and New Faces of Epidemiology: From the Epidemiology of Infectious Diseases to Social Epidemiology

Message from the Guest Editors

This Special Issue is a tribute to epidemiology. We are pleased to invite you to present your research on the epidemiology of infectious diseases, non-communicable diseases (mental disorders, cardiovascular diseases, and cancer), and social epidemiology (social determinants of health, discrimination and stigmatization, and health status of vulnerable populations). Original research and review articles are welcome, as well as meta-analyses focusing on new research areas in epidemiology, key achievements, and their relevance to public health.

- Old and new infectious diseases and neglected and emergency infectious diseases;
- Epidemiology of non-communicable diseases, such as mental disorders, cancer, and cardiovascular diseases;
- Social epidemiology, with particular reference to the social determinants of health and the health needs of vulnerable populations;
- Development of epidemiological research methods and their applications in the planning of preventive and healthcare actions;
- Translation of epidemiological research into public health action.

We look forward to receiving your inputs and contributions.
