Health Services in Children's Physiotherapy

Message from the Guest Editor

Physiotherapy is an important part of healthcare services for children. The pediatric physiotherapy service offers comprehensive and coordinate care. Children are referred to physiotherapy for a various reasons, such as psychomotor retardation, motor difficulties, asymmetry, positional preferences, and orthopedic conditions. Physiotherapy provides support and treatment to children, focusing on children's physical development and growth. We are pleased to invite you to provide evidence-based recommendations in prevention, rehabilitation, and physiotherapist treatment in children with difficulties. Original research articles and reviews are welcome. Research areas may include the following:

- Systematic reviews and meta-analyses of health services in children's physiotherapy.
- Validation studies of existing assessment tools in children's physiotherapy.
- Comparative studies about physiotherapist treatments in children.
- Cross-sectional studies for cultural adaptation of assessment tools in children's physiotherapy.
- Qualitative studies about health services in children's physiotherapy.
