

Special Issue

Oral and Maxillofacial Health Care: Third Edition

Message from the Guest Editors

Recognizing oral and maxillofacial health as a population health management strategy is imperative all over the world. The current initiative of oral and maxillofacial specialists to chart the public health issues at national and global levels and develop action plans to overcome these issues identifies oral and maxillofacial health as one of the key indicators of a healthy population, connecting good oral–dental care to a reduced risk of systemic diseases such as diabetes, heart disease, stroke, premature or low birth weight, and chronic oral pain. In this Special Issue, we will feature any original research from clinical studies as well as in vitro and in vivo studies, reviews, short reports, or opinion pieces from researchers interested in topics related to ‘Oral and Maxillofacial Health Care’.

Guest Editors

Prof. Dr. Takahiro Kanno
