

## Special Issue

# Promoting the Health of Caregivers: Addressing Physical, Psychosocial, and Spiritual Well-Being Across Acute and Chronic Care Settings

### Message from the Guest Editor

The aim of this Special Issue is to investigate caregivers' multidimensional needs across a variety of settings and explore and promote evidence-based interventions, innovative models of support, and preventive strategies to safeguard and enhance caregiver health. Emphasis will be placed on palliative care in both cancer and non-cancer diseases (e.g., dementia) and on the specific needs of professional caregivers working in critical settings. We welcome contributions that advance the understanding of caregiver resilience and identify systemic solutions that fill current gaps in the literature.

We look forward to receiving your contributions.
