

## Special Issue

# Advancing Care for Spinal Conditions and Deformities in Both Young and Old People: Cutting-Edge Rehabilitation Solutions

### Message from the Guest Editors

This Special Issue focuses on the management of spinal conditions and deformities in both young and old people, and will present different topics related to spinal rehabilitation and the treatment of spinal deformities. These papers will examine the evidence relating to the management of spinal conditions and deformities. This Special Issue will also present innovative assessment tools, treatment modalities, biomechanics and the various types, benefits, and side effects of these diverse treatment approaches. We look forward to receiving your interesting papers (such as primary research papers; RCTs; cohort pre-post studies; potentially case studies (if of sufficiently high quality); qualitative papers; and secondary research, e.g., systematic reviews and narrative reviews). We also welcome discursive papers on new technologies and the latest innovative practices.
