

## Special Issue

# Health Data as a Global Good: Best Practices, Challenges and Future Perspectives

### Message from the Guest Editors

This Special Issue aims to advance evidence-based practices and interdisciplinary research by exploring health data as a global good for improving healthcare delivery. It highlights the best practices for integrating and applying health data across diverse settings and populations, examines challenges in epidemiological surveillance and data governance, and discusses how digital health solutions can enhance health data collection to improve patient care and public health outcomes. This Special Issue seeks to bridge the gap between theory and practice by providing a platform for case studies, real-world challenges, and innovative solutions that can shape the future of healthcare delivery. Researchers and practitioners are invited to contribute high-quality research focused on the practical applications of health data to improve healthcare outcomes. Research areas may include (but are not limited to) the following:

- Health data;
- Monitoring systems;
- Epidemiological surveillance;
- Data governance;
- Public health strategies;
- Digital health.

We look forward to receiving your contributions.
