

Special Issue

Current and Future Challenges in Public Health and Disaster Preparedness

Message from the Guest Editor

In a globalized world where crisis incidents are becoming more frequent, more devastating, and have a significant impact on the health and lives of societies, the quality of healthcare services, including disaster preparedness in particular, is crucial for health security. The increased risk of a mass accident or catastrophe necessitates the organization of remedial measures intended to protect against these types of unusual events and to facilitate the preparation required to mitigate their impact. A well-established preparedness program is a prerequisite for the effective response of healthcare systems to emergencies. The main goal of this Issue is to bring together public health perspectives on disaster preparedness and develop the idea of current and future challenges from a wider perspective.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
