Prevention and Management of Oral Diseases Among Children

Message from the Guest Editors

Good oral health is essential to maintaining overall health and wellbeing, particularly in children. Oral diseases, such as dental caries, periodontal diseases, malocclusion, and oral malignancies, can have severe and long-lasting impacts on a child's growth and development. Effective management of oral disease in children involves a multifaceted approach, including prevention, early detection, and treatment. Prevention is the key to avoiding these negative outcomes, and identifying effective prevention methods is crucial for improving the oral health and quality of life of future generations. Early detection and management of oral diseases efficiently minimises their progression and future complications. We now invite you to contribute your expertise and insights to our upcoming publication focused on the "*Prevention and Management of Oral Diseases among Children*". As advocates for children's health, we believe in the power of knowledge to make a lasting impact. Your valuable contributions can help us to disseminate essential information, strategies, and research findings to empower parents, caregivers, and dental professionals in safeguarding the oral health of children.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
