

Special Issue

Functional Neurological Disorders: Pandemic and Beyond

Message from the Guest Editor

I invite you to participate in this Special Issue dedicated to functional neurological disorders, in the context of pandemic and beyond. Recent years have demonstrated that the problem of functional neurological disorders is an important health issue not only affecting patients in both the neurological and psychiatric setting. In recent years we have also experienced a surge of some functional movement disorders (e.g., functional tic-like behaviors provoked by social media), but also other factors that remain unclear. Therefore, it is crucial to further investigate the causes and pathophysiology of these disorders, which will in turn help to find new therapeutic approaches.

Guest Editor
