

## Special Issue

# Medication Therapy Management in Healthcare

### Message from the Guest Editors

Medications are crucial interventions not only for treating various disease conditions but also for preventing disease progression, morbidity, and mortality. This Special Issue aims to produce a robust and unique set of evidence on medication therapy management or medication review models in different settings and across the healthcare continuum, innovative approaches used to implement those models, and an understanding the effectiveness of such models in improving health, patient-reported, and economic outcomes. In this Special Issue, original research articles and reviews are welcome. Research areas may include the following:

- Medication therapy management approaches in chronic conditions.
- Effectiveness of medication therapy management or medication review models.
- Cost-effectiveness of medication therapy management or medication review models.
- Innovative solutions to improve the effectiveness of medication therapy management.
- Multidisciplinary medication review models to improve therapeutic drug outcomes.
