Special Issue

From Occupational Exposure to Personalised Healthcare: Risk Assessment, Prevention and Patient Management

Message from the Guest Editors

This Special Issue will focus on occupational health and diseases, with particular attention to new and better-adapted solutions addressing the needs of workers exposed to occupational hazards. For the purposes of this Issue, occupational health will be considered in a broader sense. Therefore, any scientific contribution aimed at promoting employee well-being in the workplace or preventing work-related diseases and injuries will be evaluated.

The scope also includes workplace risk assessment, novel approaches to screening and monitoring for both occupational and non-occupational diseases within occupational medicine, and interventions designed to maintain fitness for work.

Regarding occupational diseases, this Special Issue welcomes contributions on innovative biomarkers for diagnosis, strategies for health monitoring after the end of occupational exposure (e.g., to carcinogens or mineral dusts), and research on emerging occupational hazards. These include, but are not limited to, digitalisation, psychosocial risks, exposure to nanoparticles, climate change, biological risks and electromagnetic fields.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.
Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special
issues.
We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista
Louise Herrington School of Nursing, Baylor University, Dallas, TX 75246-1754, USA

Author Benefits

High Visibility:
indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:
JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
