

## Special Issue

# Climate Change and Human Health: Resilient Healthcare Strategies for Disease Mitigation

### Message from the Guest Editors

We present the Special Issue highlighting the significant progress that has been made in emphasising the role of healthcare systems in climate resilience. This issue underscores the growing significance of how climate change and other environmental factors are impacting global health. Healthcare systems play a crucial role in managing these effects, particularly through preventive strategies, adaptive policies, and technological innovations. This issue is particularly relevant for vulnerable communities who are often disproportionately affected by climate change due to their limited capacity to adapt to changing conditions. Health and environmental sustainability are intrinsically linked, and healthcare systems must adopt a proactive approach that includes prevention, adaptation, and technological innovation to address the challenges of climate change. It is vital to integrate the perspectives of public health, environmental science, and clinical practice to develop a comprehensive and effective approach that protects the most vulnerable populations. We encourage authors to contribute their research and be part of this global effort to improve health and sustainability.

### Guest Editors

Prof. Dr. Pedro Belinchón-deMiguel

Prof. Dr. Ana Isabel Beltrán-Velasco

Prof. Dr. Vicente Javier Clemente Suárez

### Deadline for manuscript submissions

31 March 2026

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
