Osteoarthritis: Prevention Strategies, Novel Diagnostics and Therapeutic Approaches and Burden Caused

Message from the Guest Editor

Osteoarthritis (OA) is without a doubt the most prevalent joint disease worldwide. It represents major health problem due to an increasing older population with higher life expectancy, associated comorbidities such as obesity, and, more recently, limited access to medical care due to various situations such the COVID-19 pandemic, all contributing to the global burden of this disease. This Special Issue aims to highlight contributions focused on new advances for osteoarthritis prevention strategies and novel diagnostic and therapeutic approaches that can also reduce the overall burden of this disease. Original research articles and reviews are welcome. Research areas may include, but are not limited to, the following:

- Updates on novel non-operative treatment strategies for osteoarthritis;
- 3D bioprinting techniques for osteochondral regeneration;
- Disease-modifying osteoarthritis drug (DMOAD) development;
- Regenerative orthopedics and joint preservation;
- Epidemiology and burden of osteoarthritis.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
