

## Special Issue

# The Role of Psychological, Environmental, and Social Factors in the Promotion of Older Adults' Health and Well-Being

### Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. The scope of this Special Issue includes, but is not limited to, the following topics:

- Systematic reviews and meta-analyses summarizing the impact of new technologies, psychological factors, and environmental factors on the health and well-being of older adults;
- The development of new tools or the validation of existing ones to assess mental and physical health, well-being, and the psychological factors involved in the aging process;
- Innovative interventions aimed at promoting the psychological and physical health and well-being of older adults;
- Examination of the role of technology in enhancing older adults' psychological and physical health and well-being;
- Examination of how the environment contributes to the promotion of older adults' psychological and physical health and well-being;
- Analyses of the impact of cultural and societal factors on older adult's psychological health and well-being;
- The identification of social and psychological factors influencing the psychological health and well-being of older adults belonging to minority groups (e.g., immigrants or LGBTQ+).
