

Special Issue

Performance of Healthcare Systems During and After the COVID-19 Pandemic

Message from the Guest Editor

The purpose of this Special Issue is to examine the changes that have taken place and their outcomes. Research areas may include (but are not limited to) the following: crisis management, operations research (medical prioritization, capacity planning, staffing, patient scheduling, etc.), systems research, healthcare management and decision making, health policy, and the assessment of health system performance through the presentation of health system evaluation indicators.

Based on the previous points, this Special Issue attempts to highlight the performance of healthcare systems after the COVID-19 pandemic, giving emphasis on patient care and healthcare delivery.

High-quality scientific and policy papers, both empirical and theoretical, from academics and researchers are welcome.

I look forward to receiving your contributions.

Guest Editor

Dr. Dimitris Zavras
