

Special Issue

New Trends in Evidence-Based Practice in Health

Message from the Guest Editors

This Special Issue will focus on the latest developments and transformative shifts in evidence based practice (EBP) across health disciplines. As healthcare continues to adapt to emerging global challenges—such as chronic disease management, aging populations, pandemics, and health inequities—new ways of applying evidence to practice are gaining relevance and urgency. The contributions featured in this Issue explore how innovation is enhancing the way we gather, interpret, and apply evidence in real world healthcare settings. These include the growing impact of big data analytics, the integration of real-time clinical decision support systems, and the role of patient reported outcomes and lived experiences in shaping more responsive care models. Strong emphasis is placed on improving the accessibility and usability of evidence at all levels of the health system—from frontline providers to health policymakers. Articles also address barriers that hinder the routine use of evidence in practice, such as a lack of time, resources, or training, and propose practical solutions through capacity-building, leadership, and organizational change.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
