

## Special Issue

# Music Therapy and Physical Activity in Neurological Diseases

### Message from the Guest Editors

Our aim for this Special Issue is to collect research that investigates the role of music therapy and physical activity in neurological diseases across the human lifespan. This Special Issue will focus on new approaches and training protocols with and without music, as well as applications of new technologies in health-related aspects of neurological diseases. New challenges are emerging for researchers promoting health-related aspects for people with neurological diseases. In response to this, our aim for this Special Issue is to collect papers exploring the multi-dimensional concept of health-related quality of life, including domains related to music-based interventions in the context of physical, mental, emotional, and social functioning. Authors are invited to contribute to this Special Issue by submitting letters, original research papers, case studies, meta-analyses, and systematic reviews that contribute new knowledge to the area of physical exercise and music therapy, as well as psychology, neuroscience, education, medicine, and clinical practice.

### Guest Editors

Dr. Claudia Vinciguerra

Neurology Unit, Department of Medicine, Surgery and Dentistry "Scuola Medica Salernitana", University of Salerno, 84131 Salerno, Italy

Prof. Dr. Giuseppe Battaglia

Department of Psychology, Educational Sciences and Human Movement, University of Palermo, 90144 Palermo, Italy

### Deadline for manuscript submissions

30 November 2025
