

Special Issue

Nursing Care for Cancer Patients

Message from the Guest Editor

With aging populations and advances in cancer screening and treatment technologies, the number of cancer survivors has increased substantially worldwide in recent decades. It is well-accepted that cancer and its treatment affect not only the patient but also their close family members leading to the description of cancer as a 'we-disease'. This Special Issue of *Healthcare* seeks all types of study design, including papers reporting systematic reviews and meta-analyses, quantitative, qualitative, or mixed methods studies, case studies and other designs, in accordance with cancer care associated with supporting cancer survivors, family caregivers, and oncology professionals.
