Exploring the Burden on the Healthcare Service Sector Arising from Occupational Injury and Psychological Distress Caused by Poor Work Environments

Message from the Guest Editor

The healthcare service sector plays a critical role in addressing the physical and mental health needs of individuals impacted by occupational injuries and psychological distress due to adverse work environments. This Special Issue seeks to acquire contributions that elucidate the challenges faced by healthcare providers and solutions developed in addressing the healthcare needs of individuals affected by occupational injury and psychological distress due to poor work conditions. The healthcare sector offers a unique setting in which workers are both the subjects of a work environment and the providers of healthcare services for injured workers. We invite researchers from diverse disciplinary backgrounds, including but not limited to public health, occupational health and safety, psychology, sociology, and healthcare management, to submit original research papers that examine various aspects of the burden on the healthcare service sector associated with occupational injury and psychological distress caused by poor work environments.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista
