

Special Issue

Neurodiagnostics in Public Health: Cognitive Decline, Mental Health, and Emerging Technologies

Message from the Guest Editors

This Special Issue covers the interface between neurodiagnostics, public health, and cognitive neuroscience with a focus on new diagnostic approaches, psychological testing, and influences of environmental and epidemiological factors on cognitive capacity. Developments in biomarkers, artificial intelligence, digital diagnosis, and public health interventions provide encouraging avenues for early detection and intervention. We invite original studies, systematic reviews, and clinical case studies examining novel diagnostic strategies that harness the strengths of neuropsychology, cognitive neuroscience, and public health frameworks. **Topics of Interest Include:**

- **Cognitive Neuroscience and Neuropsychology:**
- **Biomarkers and Imaging in Neurodiagnostics:**
- **Public Health and Epidemiological Aspects of Cognitive Decline:**
- **Digital and AI-Driven Diagnostics:**

By bringing together cognitive neuroscience, clinical neuropsychology, and public health, this Special Issue seeks to drive early diagnostic solutions for neurocognitive and neuropsychiatric disorders.

Guest Editors

Dr. Evgenia Gkintoni
