Advancing Diabetes Self-Care: Home-Based and Community-Centered Strategies

Message from the Guest Editor

Diabetes, due to its chronic nature, requires a comprehensive and multidimensional treatment approach. One of the most important aspects of managing the condition is patients' knowledge of self-care. Without sufficient understanding in this area, patients may face complications and adverse effects on both their physical and mental health. This Special Issue aims to publish clinical findings related to the assessment of needs and support options for individuals living with diabetes. By identifying patient needs and evaluating available resources, care can be tailored to meet the specific requirements of people with diabetes in home-based settings.

- Disease prevention and early intervention in diabetes;
- The socio-economic impact of long-term diabetes care on patients and health systems;
- Comprehensive physical and mental health assessments in people living with diabetes;
- Medication management, adherence, and optimization of pharmacotherapy;
- The role of mental health in chronic disease outcomes;
- Evidence synthesis through systematic reviews and meta-analyses;
- Cross-sectional analyses linking psychosocial factors with clinical outcomes.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
