New Developments in Endotracheal Intubation and Airway Management

Message from the Guest Editors

New devices and techniques of endotracheal intubation have been recently developed. These include new laryngoscopes, video laryngoscopes, and new supraglottic airway devices with increased seal and vision-guided systems. These devices increase safety and effectiveness in airway management. The new developments have generated the need for their clinical and experimental evaluation. I invite you to design, conduct, and publish studies on these new devices and techniques. This Special Issue is open to all ideas that could improve airway management and aims to make share them widely to the scientific world.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q1 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
