Special Issue

Research, Education, Workforce, and Regulation to Transforming Nursing Practice and Leadership: The Future of Nursing

Message from the Guest Editors

This Special Issue of *Healthcare* aims to connect the "dots" of research, education, workforce, and regulation to transform nursing practice and leadership toward a new era of integrated healthcare. Aspects related to research, education, workforce, and regulations are required to be connected, understood, and studied to unlock the full potential that the nursing profession can bring to the broad healthcare arena by allowing the utilization of new technologies and developing integrated health and social care models. In this Special Issue, we welcome empirical, clinical, and review research and perspective papers focusing on nursing research, education, workforce, regulation, and leadership to uncover the potential of nursing practice and science in meeting domestic demands and global healthcare needs.
