Applied Precision Medicine in Clinical Practice—an Approach Consisting of More than Molecular Biology and Gene Therapy

Message from the Guest Editors

Precision medicine aims to provide care and treatment according to individual conditions and needs, thus improving the quality of care. In clinical practice, decision support tools with reference values for vital parameters and biomarkers are used to facilitate the assessment of individuals' health conditions. This Special Issue aims to focus on essential topics relevant to improving individualized assessments of health conditions in clinical practice. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following professional areas: Applied precision medicine in nursing, medicine, laboratory science, etc. We are pleased to invite you to submit original research and review articles. We hope you and your colleagues will be willing to submit your work to this exciting Special Issue of *Healthcare*. We look forward to receiving your contributions.
