

Special Issue

Women's Health Care: State of the Art and New Challenges

Message from the Guest Editor

We invite you to contribute to our Special Issue on research related to women's health and the furthering of evidence for women's life-long wellbeing. Health issues involving women include mental health problems, particularly postpartum depression, and cervical cancer, a leading cause of death in young women. Currently, we are seeking ways to solve these problems through the framework of health science rather than medicine. In this Special Issue, we would like to highlight a wide range of research achievements on health issues concerning women. In particular, we invite wide-ranging submissions not only from the medical scientists but also from researchers related to the nursing profession and healthcare. Research related to multi-profession is particularly desirable.
