

Special Issue

Increasing Access to and Quality of Healthcare Services to Promote Community Health Equity

Message from the Guest Editors

We are pleased to invite you to submit a manuscript for this Special Issue of *Healthcare*. The accessibility and quality of healthcare play an important role in protecting and promoting the health of populations. This Special Issue focuses on highlighting promising evidence-based and data-driven practices and studies that reduce health disparities and promote health equity. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Investigations of social, cultural, economic, and political determinants of health disparities.
- Promising evidence-based or data-driven practices which result in institutional changes improving access to and/or quality of care for patient populations at higher risk for adverse health outcomes.
- Policy-level interventions (local, state, or federal) which increase access to culturally appropriate care, improved outcomes, and/or reduce disproportionate burdens of risk, illness, and/or death.

We look forward to receiving your contributions.
