Emerging Developments in Integrative and Complementary Medicine: Advancements in Research and Clinical Applications—Second Edition

Message from the Guest Editor

In recent decades, interest in complementary and alternative medicine (CAM) has been steadily increasing in Western societies. Integrating CAM approaches, such as Traditional Chinese Medicine (TCM), into Western healthcare and research frameworks calls for a pragmatic and science-driven strategy. While TCM serves as a prominent example, this Special Issue aims to encompass a wide range of CAM approaches, including but not limited to Ayurvedic medicine, naturopathy, osteopathy, and integrative mind-body practices from diverse cultural and clinical backgrounds, such as meditation-based therapies, yoga, Reiki, and healing touch, among others. We warmly invite submissions focused on clinical applications, outcomes, and patient safety as well as the clinical applications of TCM. Topics of interest include, but are not limited to, acupuncture, moxibustion, Chinese herbal medicine, dietetics, Qigong, Tai Chi, Tuina, automated diagnostic systems, and other CAM approaches, as well as investigations into biofield phenomena and the role of intention.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
