

Special Issue

Improving Healthcare Quality

Message from the Guest Editors

Training in health sciences, which is increasingly important for a globalized world, requires professionals involved in multidisciplinary knowledge and trained to apply direct techniques to the patient/client. Among these, attention must be paid to the pain of patients of all ages and dimensions, without forgetting that new simulation techniques for direct treatment in emergencies and emergencies are of vital importance in the face of the new challenges of the 21st century. This Special Issue invites research within quality standards, in narrative, scoping, integrative, as well as systematic reviews with/without meta-analysis and original articles (qualitative/quantitative) dealing with topics such as the improvement of higher education leading to quality interprofessional practice in a system centered on all areas involving direct patient care, encouraging a change in attitudes towards teamwork focused on interprofessional care and professional practice.
