

Special Issue

From Evidence-Based Practice to Knowledge Translation in Nursing Care

Message from the Guest Editors

Nursing faces the critical challenge of translating evidence-based practice into actionable knowledge, improving patient outcomes, and addressing contemporary healthcare needs. This issue focuses on innovative research and strategies for effective knowledge translation in diverse nursing settings. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Knowledge translation models in nursing care;
- Patient-reported outcomes and healthcare quality;
- Nursing competencies and clinical risk management;
- Health literacy and patient education;
- Comparative effectiveness in transitional care models;
- Integrating digital health tools in nursing practice and patient management;
- Organizational strategies for enhancing patient safety and reducing clinical risk;
- Impact of interprofessional collaboration on healthcare delivery outcomes;
- Pathways for integrated patient-centered care;
- Safety and quality science.

We look forward to receiving your contributions.
