

## Special Issue

# Pharmacist-Led Interventions in Public Health: A Global Perspective

### Message from the Guest Editors

Globally, pharmacists remain one of the most accessible health professionals. Due to their clinical knowledge, pharmacists are well-positioned to enhance their scope of practice through the public health lens by caring for patients and initiating interventions. This Special Issue in Pharmacist-Led Interventions in Public Health: a global perspective is focused on the broad spectrum of public health, including prevention studies such as pre-exposure prophylaxis (PrEP) and post-exposure treatment (PEP), vaccine, vaccine hesitancy, pharmacy driven studies conducted in rural or urban areas, collaborative practice agreement studies. We look forward to receiving your submissions describing pharmacists' role to enhance their visibility in public health by optimizing patient care in the community setting. To of interest include but are not limited to the following:

- Interdisciplinary collaboration in public health
- The role of technology in public health, including artificial intelligence
- Interventions in community-based pharmacy
- Population health interventions across the pharmacy practice settings
- Education and training of public health professionals
