Non-substance Addiction: New Perspectives and Frontiers of Risk Behaviors

Message from the Guest Editors

The concept of addiction is controversial, but in the last few years, its definition has covered not only substance but also activity and behaviors that show similar features of substance addiction. According to the APA's DSM-5, the interest in the diagnostic features of behavioral addictions (or non-substance addictions) appear clear due to the spread of new risky behaviors involving new technologies and largely diffused habits. This Special Issue aims to disseminate new and innovative insights focused on (i) the phenomenon of non-substance addiction: What behaviors? How do they appear? When can we differentiate a common behavior from a pathological one?; (ii) aspects that may be framed as risk or predictive factors of non-substance addiction; (iii) defining the impact of non-substance addictions on health in a multidimensional frame (bio-psycho-social approach); and (iv) new perspectives and theoretical models for non-substance addiction and their possible diagnosis. In this Special Issue, original research articles and reviews focused on these aspects or that may furnish a new point of view on non-substance addiction are welcome.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
