

Special Issue

Evaluation of the Usability of Healthcare Systems

Message from the Guest Editors

A wide range of healthcare information systems are being deployed worldwide, ranging from electronic health records to clinical decision support, emerging applications of AI as well as many patient-facing applications. However, a variety of issues and challenges remain regarding the usability of many of these systems and applications in healthcare. There continue to be reports of systems that have been deemed unusable by the end users, that have been perceived as adding to workload (rather than reducing it) and that may inadvertently lead to unsafe healthcare. Usability and user experience are now recognized as being critical areas for evaluation in order to improve adoption, efficiency and user satisfaction of healthcare systems. Central to this is the development of evaluation methods and approaches that can practically inform design (and redesign) of healthcare systems. New research papers, short communications, perspectives articles and reviews are all welcome in this special issue. The issue aims to bring together work that critically examines approaches to the evaluation of usability and user experience from multiple perspectives.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
