

Special Issue

Airway Management in Anesthesia: Progress, Precision, and the Path Forward

Message from the Guest Editors

This special edition brings together leading voices in the field to highlight current best practices, emerging innovations, and persistent challenges in airway management. Our vision is to foster a culture where airway safety is never compromised, where every clinician is empowered through education and rehearsal, and where airway management evolves through collaboration, research, and reflection. As we chart the future of anesthesia, let us place airway excellence at its core, ensuring that every breath, in every patient, is safeguarded by design.
