

Special Issue

Patient-Reported Measures

Message from the Guest Editor

Patient-reported measures (PRMs) of outcomes and experience are an important aspect of providing high-quality primary health care (PHC). PRMs provide insight to healthcare professionals, practices and primary health networks about patient experiences, needs and expectations and areas of importance to patients, in addition to highlighting areas of achievement and gaps. This Special Issue of *Healthcare* seeks commentaries, original research, short reports, and reviews on the development, function, validation and evaluation of PRMs in the context of healthcare. The aim is to inform health policies, strategies and systems to empower the voice of patients.
