

Special Issue

Antimicrobial Resistance, Healthcare-Associated Infections, and Environmental Microbial Contamination

Message from the Guest Editors

We are organizing a Special Issue entitled “Antimicrobial Resistance, Healthcare-Associated Infections, and Environmental Microbial Contamination” in *Healthcare*.

Among the main solutions to contrast nosocomial infection, beyond implementing standard precautions (e.g., best hand hygiene practices), improving staff education and accountability, correctly applying basic precautions during invasive procedures, environmental monitoring, and the appropriate use of antimicrobials play an important role. In this regard, on one hand, environmental monitoring is a useful tool for assessing the effectiveness and efficiency of the measures adopted to control the risk of infection; on the other, antimicrobial resistance (AMR) is considered one of the top 10 global public health threats facing humanity, which is strongly related to drug misuse and overuse both in nosocomial and community environments.

We welcome the submission of reviews, original research articles, short communications, editorial letters, systematic reviews, case studies, and other kinds of articles targeting any of these core research questions and beyond.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
