# Special Issue

# Burnout, Perceived Efficacy, Compassion Fatigue and Job Satisfaction

### Message from the Guest Editor

Burnout, perceived efficacy, and job satisfaction are matters of great concern among today's workforce, especially those working in the health sector. There are many disciplines in the health sector that are grappling with low recruitment and poor retention issues as clinicians report high levels of burnout and poor job satisfaction. Sustainability of the health workforce is likely to become a major issue in the years to come. This could have a major impact not only for the workforce directly affected but also for the wider population, who will continue to need quality healthcare. We invite researchers from across the globe to share their findings on burnout, perceived efficacy, and job satisfaction in the open access forum of *Healthcare*.
