# Breast Cancer Prevention in Healthcare: A Comprehensive Overview

### Message from the Guest Editor

This Special Issue aims to explore the relationship among all these connected perspectives in breast cancer prevention and women's healthcare. We would like to provide a transversal overview, from primary prevention up to tertiary prevention, including the involvement of therapeutic and prophylactic breast surgery, beyond adjuvant therapies, starting from epidemiology, through imaging, in order to assess the deep impact of diagnosis and treatments on quality of life and psychological health of breast cancer patients.
