

## Special Issue

# Research and Service for Chronic Obstructive Pulmonary Disease

### Message from the Guest Editor

Chronic obstructive pulmonary disease (COPD) is one of the most common chronic diseases. The aim of this Special Issue is to publish original research and reviews, both clinical and observational, regarding the care of COPD patients; cooperation between family physicians and specialists; and the use of modern, innovative technologies in diagnosis and treatment and the organization of care for COPD patients. In this Special Issue, original research articles and reviews are welcome and research areas may include, but are not limited to:

- Systems of care for COPD patients and cooperation between different levels of care;
- The use of innovative technologies (e.g., telemedicine or artificial intelligence) in the diagnosis of and therapy for COPD patients;
- COPD patient perspectives on the therapy and care provided, including patient-reported outcome measures (PROMs) and patient-reported experience measures (PREMs);
- Systematic reviews and meta-analyses of existing tools for assessing the effectiveness of care for COPD patients.

I look forward to receiving your contributions.
