Cohort Study of Oral Health

Message from the Guest Editor

Oral diseases are representative chronic diseases that most people suffer from. Most oral diseases, except dental caries, occur in later life in adults and the elderly, but we still do not know the causes and mechanisms of oral disease. We have learned much about human chronic diseases such as cardiovascular and metabolic diseases from cohort studies which began in the mid-20th century. However, research on cohort studies of oral diseases is not yet active. A major research methodology that can reveal the causes and mechanisms of oral diseases, ranging from the cellular level to the socio-environmental levels, is the cohort study from the early stage of life. A cohort study of oral diseases can provide significant progress in disease prevention, health promotion, and improving quality of life if the cause and mechanism of the disease and its relationship with other chronic diseases can be identified. This Special Issue covers a wide range of recent research findings on cohort studies in oral disease.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
