# Special Issue

# Occupational Stress and Burnout in Healthcare Workers

## Message from the Guest Editor

Our special issue will explore the conceptualization, measurement, epidemiology, causes, and consequences of healthcare worker burnout, as well as possible interventions.

For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Definitions, symptoms, and the nomological network of burnout;
- The measurement and surveillance of burnout;
- Prevalence rates of burnout across specific healthcare professions, regions, and settings, with a focus on understudied populations;
- Causes and risk factors for healthcare worker burnout;
- Consequences of healthcare worker burnout in relation to clinicians' health and well-being, organizational behavior, healthcare organizations, health systems, health policy, and patient outcomes;
- Interventions to address healthcare worker burnout;
- Healthcare worker burnout in the era of generative artificial intelligence (GenAl).
