

## Special Issue

# Decision Modelling for Healthcare Evaluation

### Message from the Guest Editor

Today, the economic climate means that health economic modelling is increasingly used to inform the decision of health care systems about which health care interventions to finance. The study of health decision modelling is rapidly growing due to the fact that governments, insurers, healthcare organisations and the pharmaceutical industry recognise the need to estimate the costs, clinical outcomes and benefits of healthcare systems. This Special Issue will bring together state-of-the-art research and practical applications of Decision Modelling for Healthcare Evaluation. Topics of interest include but are not limited to the following:

- Decision analytic models for healthcare evaluation
- Decision probabilistic models for healthcare evaluation
- Analysing and presenting simulation output from decision modelling for healthcare evaluation
- Decision modelling for healthcare under uncertainty
- Technology and decision modelling for healthcare
- Other related topics

---

### Guest Editor

Dr. Rocío De Andrés Calle

Foundations of Economic Analysis (PTUN), University of Salamanca,  
37080 Salamanca, Spain

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1  
(Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
