

## Special Issue

# COVID-19: Digital Health Response around the World

### Message from the Guest Editor

The COVID-19 pandemic has affected the global population in many different ways and has caused significant changes in the lives of people in all areas of the world. In this Special Issue, we invite research topics on a wide range of digital solutions that have been proposed and adopted to address this crisis. The topics of this issue include areas and applications such as quarantine management, identification of viral sources, monitoring of infected populations and areas, automation of in-hospital and out-of-hospital care processes, telecare, tele-rehabilitation, protection of health professionals and citizens, among others. Sensor technologies, robots, intelligent information systems, artificial intelligence, deep learning, mHealth, IoT and other topics will be included in the examined field. Moreover, issues related to the objective and subjective assessment and evaluation of such digital solutions, comparison between countries, privacy and security concerns, the socioeconomic impact, the problems encountered in practice or the potential of these applications are also analyzed in this Special Issue.

### Guest Editor

Dr. Yiannis Koumpourous
