Contemporary Oral and Dental Health Care: Issues and Challenges

Message from the Guest Editor

The World Health Organization (WHO) estimates that approximately 50% of the world's population suffers from oral diseases. Beyond being prevalent issues, oral diseases profoundly impact individuals' lives and society as a whole. Consequently, many countries have integrated dental health services into their public health systems, employing various strategies in order to do so. With the WHO aiming for universal health coverage for oral health by 2030, the assessment of dental health services has garnered increasing attention within the scientific community. Observational, interventional, and qualitative studies serve as valuable methods for evaluating the quality and impact of these services. Such studies can pinpoint areas of concern, signal warnings, reinforce positive aspects, and refine unsuccessful strategies. This Special Issue seeks to include contributions from researchers worldwide to share their scientific findings and the challenges encountered in the development and evaluation of dental health services. Our goal is to describe and address some of these challenges, supporting the improvement and coordination of dental health care services in so doing.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
