

## Special Issue

# Advancing Health Education: Integrating Education, Evaluation and Intervention for Population Well-Being in Healthcare and Sexuality

### Message from the Guest Editors

This Special Issue aims to delve into the intricate relationship between health education, the assessment of sanitary and educational environments, and targeted interventions designed to enhance the overall health of populations. The link between education and health outcomes has been widely acknowledged, but this Special Issue seeks to provide a comprehensive exploration of innovative approaches, strategies, and interventions that can be implemented to address health disparities and improve well-being on a broader scale. We invite researchers, clinicians, educators, and policymakers to contribute to the development of effective interventions.
