

Special Issue

Implementation of GIS (Geographic Information Systems) in Health Care

Message from the Guest Editors

Geographic Information Systems (GIS) is a well adopted instrument to explore and examine such spatial patterns in disciplines that benefit from investigating spatial patterns of their subjects, such as health geography and spatial epidemiology. However, GIS often has been limited in health care applications, for example, to data preparation, spatial pattern and clustering description, spatial autocorrelation measurement, and spatial accessibility measurement. This special issue aims to publish research papers that contribute to extending the utility of GIS in health care and/or public health research. Specifically, this special issue encourages researchers to submit papers that present novel GIS applications to investigate and enhance research on health care system and related public health issues. In addition, it welcomes research outcomes that present methodological innovations in Geographic Information Sciences (GISc) that advances the investigation of health care and public health issues from a new perspective. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
